

Borrowing Personal Care and Mobility Equipment

*...in him we live, and move, and have our being.
(Acts 17:28)*

There may be times when a piece of well-designed equipment can help you move with grace as you're working out a challenge. Depending on the specific need, personal care and mobility equipment can often be borrowed from a local Christian Science nursing facility or visiting service. Some of the devices may include:

- Walkers, canes, or crutches
- Wheelchairs
- Raised toilet seat
- Toilet safety rails or arms
- Shower chairs, tub transfers
- Lift chairs

Christian Science facilities or visiting services may also have disposable products available (bandaging or incontinence products).

Click below to find out if there is a facility or service in your area:

For larger pieces of equipment, another option is to rent. Vendors can be found by searching online using a phrase such as "Rent a _____ near (zip code)."
